Magnetic sensor, cylindrical form RC 23 1W-5m NIRO Extreme. Steute

## Dimensions

## Contact diagram

## Technical Data

Standards:
Enclosure:
Actuator:
Cable:
Contakt material:
Switching system:
Switching elements:
Switching voltage:
Switching current:
Switching capacity:
Ambient temperature:
Mechanical life:
Switching frequency:
Resistance to vibrations:
Protection class:

EN 60947-5-1
stainless steel
series M permanent magnet
lead free pre-wired cable PVC H05VV-F , 5 m long
Rhodium
reed contacts
change-over contact
max. 250 V AC/DC
0.5 A
max. 30 W
$-10^{\circ} \mathrm{C}$ to $+80^{\circ} \mathrm{C}$
$>10^{9}$ operations
max. 200 Hz
35 g
IP 67 to IEC/EN 60529 overload.

At inductive load:

| coil voltage | serial resistor <br> Rs |
| :---: | :---: |
| 24 VDC | 27 Ohm <br> 24 VAC <br> 230 VAC |
| $330 \mathrm{Ohm} / 0,6 \mathrm{~W}$ |  |

Due to the cable capacitances it is necessary to place the series resistors as near as possible to the reed contact, in general the next terminal point (junction box)

Additionally. Fa. Finder recommends a parallel resistor for the 230V-type

## Directive for the protection of reed contacts:

With unknown input currents, input capacitances we recommend the interposing of an interface relais. When using Finderrelais series 49, in the following you will find some proposals to protect the reed contact against

At capacity load, wires longer than 5 m or connection with process control system with capacity input:
