

# Sounder 105 dB (A) / 110 dB (A) DS 5 / DS 10

The sounders from the DS 10 / DS 5 series can be used for tough demands under industrial conditions and as universal alarms. The sounders, which are suitable for use both indoors and outdoors, generate warning signals in 31 different tones can be selected with the aid of an internal switch. Optionally, a maximum of 3 additional tones can be switched to by means of an external controller. In addition to the factory settings, the tone combination can be individually selected by means of on-site programming (tone 32).

Custom versions are available for special applications.

## Options / accessories

External tone selection (2 variants) for controlling several tones over great distances:  
1: for all voltages = potential-free NO function  
2: for 12 V / 24 V = voltage input
