## (13) SCHEDULE

(14) to EC-Type Examination Certificate KEMA 00ATEX2006 X

Issue No. 5

## Description

Electronic Beacons, Types BExBG05D(-P)(-SIL), BExBG10D(-P)(-SIL), BExBG15D(-P)(-SIL), BExBG21D(-P), BExTBG05D(-P), BExBGL1D and BExBGL2D, housed in aluminium enclosures in type of protection flameproof enclosure "d" and dust ignition protection by enclosure "tb", are used to provide visual warning signals.

The Beacons are provided with a glass dome.
LED Beacon Types BExBGL1D and BExBGL2D are provided with a plastic dome cover.
Other Beacons are optionally provided with a plastic dome cover indicated by the suffix $-P$ to the type designation; e.g. BExBG21D-P.

Electronic Beacons, Types BExBG05D, BExBG10D and BExBG15D, with a supply voltage of 24 Vdc have an optional monitoring module. For these the type designation is extended with -SIL.

The enclosure provides a degree of protection of IP66/IP67 per EN 60529 and EN 60079-0.
For details about electrical data and marking see Annex 1 to this certificate.

## Installation instructions

The instructions provided with the equipment shall be followed in detail to assure safe operation.
(16) Test Report

No. NL/KEM/ExTR10.0005/03.
(17) Special conditions for safe use

In case of repair, contact the manufacturer for information on the dimensions of the flameproof joints.

The enclosure may generate an ignition-capable level of electrostatic charges under certain extreme conditions. The user should ensure that the equipment is not installed in a location where it may be subjected to external conditions that might cause a build-up of electrostatic charges on non-conducting surfaces.
(18) Essential Health and Safety Requirements

Covered by the standards listed at (9).
