## ABS Plastic and Polycarbonate Enclosures

The ABTECH ZP range of enclosures comprises of 19 different sizes which are injection moulded in either ABS plastic or polycarbonate material. There is also an option of a clear polycarbonate lid which can be fitted to either base.

The enclosures are lightweight yet extremely robust and offer good protection against both corrosion and oil based contamination. The enclosure shares the labyrinth seal arrangement which is common to both the ZAG and BPG ranges and can offer protection up to IP65.

Stainless steel captive quick release quarter turn screws are fitted as standard offering a quick yet reliable method of securing the lid. This can provide a considerable cost saving in assembly times with on-average savings of 2 minutes per enclosure over conventional screws. As an option conventional threaded screws may be fitted if required.

The mounting holes, although contained within the profile of the enclosure, sit outside the seal and all the external fasteners and fixings are manufactured from 316 grade stainless steel to ensure reliability. External stainless steel mounting feet are offered as an option.

The ZP range is an extremely versatile enclosure with many uses and applications including junction boxes, instrument enclosures and a multitude of OEM applications. The addition of the clear lid makes the ZP range particularly suitable for housing instruments and indicators where a visual indication is required without the need for opening the enclosure.

The ZP range can be machined, drilled and tapped with various thread forms and can also be silk screen printed. The ZP range can be moulded in almost any colour subject to minimum quantities.

At our factories in England, Germany and the United States we have specialist machining centres for the ZP range of enclosure. These machines use the dedicated tooling and programming which is specific to the requirements of the material and reflect the increasing usage of this enclosure range, especially in small batch production.

Internal components are located via a series of moulded pillars which can be fitted with threaded inserts or alternatively can accept self tapping screws and these are used for the fitment of a component mounting plate or DIN standard terminal mounting rails such as TS 15, TS 32 or TS 35.

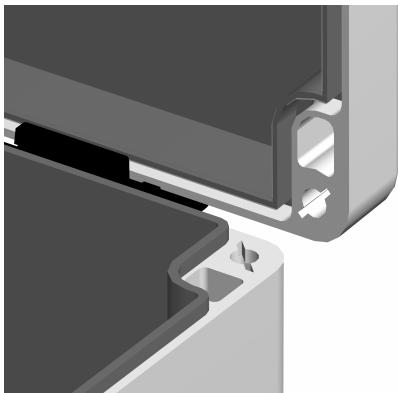

Earthing can be accomplished through various means. For example, an internal / external earth stud, which in turn can be connected to the terminal mounting rail or component plate can be used as well as various rail mounted earth terminals or proprietary earth bars which can be fitted inside the enclosure.

The screening against RFI (radio frequency interference) is achieved by the use of a metallised coating of 50 micron thickness to the internal surfaces of the enclosure and the fitment of an RFI gasket. The ABTECH Sales team can give advice on suitable RFI gaskets and finishing techniques which will provide optimum protection but typically the following characteristics are achievable:-

**Electrical Attenuation;**  
55 – 65dB @ 500MHz to 1000MHz

**Magnetic Attenuation;**  
35dB @ 40KHz to 300MHz

#### ZP Range Features

- Wide Operating Temperature (- 70°C to + 120°C) (-94°F to +248°F)
- Ingress Protection up to IP65
- Available in Polycarbonate and ABS
- Optional Transparent lid
- Can be moulded any colour (subject to minimum quantities)
- Can be easily machined and silk screen printed
- Ideal for Instrument housings and junction boxes

Ordering Example;

**ZP12 ABS MF**

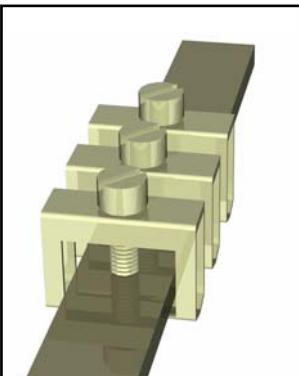

(ZP12 moulded in ABS material with External Mounting Feet)

- Standard lid fixing screws are ¼ turn quick release type.
- Silicone gasket increases temperature rating (-70°C to +120°C) (-94°F to +248°F) and may increase working life.
- Radio Frequency Interference (RFI) gasket may reduce IP rating. Enclosure may also be internally coated with RFI material.

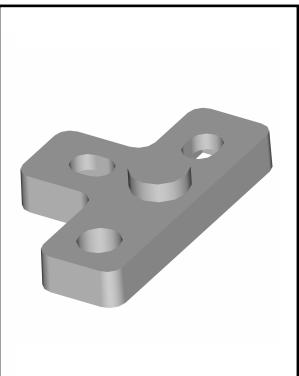

## ABS Plastic and Polycarbonate Enclosures

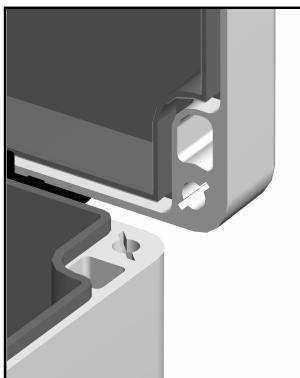

Component Mounting Plate  
(tufnol as standard, steel an option)

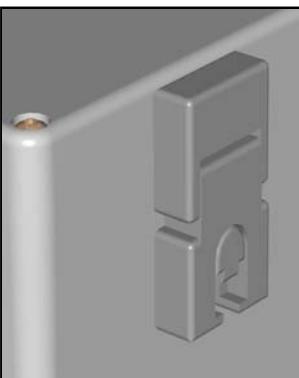

Internal Earthing Bar  
(can be fitted with clamps)

Drilling Envelope Size		
Side A-C	96 x 59mm	
Side B-D	76 x 59mm	

The diagram illustrates the drilling envelope size for the ZP10 enclosure. It shows a top-down view of the enclosure with four arrows indicating dimensions: 
 

- Arrow A: Depth of the enclosure (Side B-D).
- Arrow B: Width of the enclosure (Side A-C).
- Arrow C: Height of the enclosure (Side A-C).
- Arrow D: Width of the base of the enclosure (Side B-D).

 The overall shape is a rectangular prism.

ZP 18 Drawing

The technical drawing illustrates a metal frame assembly with two views. The left view shows a vertical profile with a total width of 150 mm, a top thickness of 5.92 mm, and a bottom thickness of 10 mm. A central cutout has a width of 50 mm and a height of 1.97 mm. The outer dimensions are 143 mm wide and 5.65 mm high. A circular feature with a diameter of Ø 7.2 mm is located on the left side. The right view shows a horizontal frame with a total length of 360 mm and a height of 192 mm. The frame features a central rectangular opening with a width of 165 mm and a height of 6.52 mm. The overall height of the frame is 192 mm, with a top section of 200 mm and a bottom section of 7.58 mm. The frame is secured with numerous circular fasteners, with specific dimensions for the spacing between them: 0.99, 1.58, 1.58, 90, 3.56, 40, 40, 1.58, 1.58, and 0.99 mm. The total height of the frame's side walls is 156 mm, with a top section of 6.16 mm and a bottom section of 13.9 mm. The distance from the bottom edge to the base of the frame is 5.49 mm.

All blue dimensions in mm, all green dimensions in decimal inches (drawing not to scale)
